

CerTrax

Ditch Excel. Manage Certificates and Permits Better with cerTrax.

USE CASES

01 Manage Employee, Contractor and Vendor Certificates

Keep all the certificates needed for work in one place. With CerTrax it is easy to ensure a compliant workplace at all times.

02 Manage 5000-23s and SOPs

Move your forms into the 21st century. Make the workplace more efficient with fully digitized training forms and standard operation procedure.

03 Manage Equipment Training

A solid understanding of assets, both equipment and personnel, is critical to efficiency. Using CerTrax, keep track of the training each employee has and the equipment they are trained on.

Manage all the things that aren't easy to manage. Easily.

CerTrax is a mobile enabled application used by mines, quarries, aggregates, contract miners and their vendors and suppliers to manage Compliance and Training requirements for every employee on a site. This ensures that all the work being done around the mine is being done with the proper certificates. Additionally, CerTrax allows for easy management of 5000-23s and SOPs. cerTrax makes managing equipment training simpler than ever. Every other aspect of mining is being digitized, it is time to bring the training process up to speed; because at the end of the day, CerTrax boils down to providing better competency, better safety and better mining.

CerTrax Desktop

The desktop version of CerTrax functions as a command center. Update data, certifications and training information directly from the web. Additionally, supervisors can manage forms, such as 5000-23s and SOPs, all with the convenience of an internet based, digital application. A supervisor is only a few clicks away from checking on the compliance of employees before a task.

CerTrax Mobile

Take your certifications with you anywhere. With CerTrax mobile's online/offline functionality, you won't have to panic when MSHA asks to see your certifications five hundred feet underground. A digitally equipped workforce can keep track of equipment, training and certificates no matter where they are. CerTrax mobile lets you keep all the data you need right in your pocket.
